PROFESSIONAL SUMMARY

Data Science Engineer with 4+ years of experience across data engineering, advanced analytics, and machine learning. Proven track record of delivering cloud-based data solutions using Python, SQL, Snowflake, Azure, and DBT. Strong background in building scalable pipelines, deploying ML models, and driving data-driven decision-making. Hands-on familiarity with customer retail operations and systems from on-ground experience. Adept at cross-functional collaboration, stakeholder engagement, and agile delivery.

TECHNICAL SKILLS

Languages: Python, SQL, Java, Kotlin, R (basic), Scala (familiar)

Data & ML Tools: Snowflake, DBT, PySpark, Pandas, NumPy, Scikit-learn, Hive, Spark

Cloud & Tools: Azure Data Factory, Azure ML Studio, Databricks, AWS (EC2, S3), Docker, Git, GitHub, CI/CD

Productivity & Workflow: Jira, Confluence, Agile methodologies

Specialties: ML Pipelines, Data Pipelines, Data Modeling, ML Model Deployment, Computer Vision

PROFESSIONAL EXPERIENCE

Software Engineer - CRM | Capillary Technologies, Bangalore, India

Jan 2022 – Mar 2023

- Developed scalable data pipelines and modular backend services, improving reliability for data-driven CRM systems used by global clients like Shell and Royal Canin.
- Led integration of region-specific logic into the Shell Petroleum App using modular data layers. *achieving 50% faster deployment through a configurable backend architecture.*

Software Developer | Nineleaps Technology Pvt. Ltd, Bangalore, India

Jul 2019 – Jan 2022

- Designed data ingestion and transformation flows using Python and AWS to support real-time analytics fintech apps, improving loan eligibility predictions and automated decision workflows.
- Developed machine learning-based credit scoring systems improving loan approvals for underserved borrowers
- Received multiple "Feather on Hat" awards for high-impact deliveries.

SELECTED PROJECTS

Medical Image Segmenter (MedSegDiff) | UNSW Capstone Project

- Developed a robust medical image segmentation system using Deep Learning (Swin Transformer, UNet, Guided Diffusion) achieving high accuracy (~86%) in segmenting skin lesions from noisy medical datasets, improving diagnostic precision.
- Co-authored a research paper which is published under a senior management.

ApnaIAS | AI-powered Essay Evaluation Platform

- Developed an advanced essay evaluation system leveraging Natural Language Processing (NLP) and machine learning (Python, TensorFlow) to provide automated, accurate feedback to civil service aspirants.
- Improved grading consistency and reduced manual evaluation time significantly, directly benefiting thousands of users.
- Gained recognition for innovation in education technology by being featured in The Hindu BusinessLine.

Aspire Fintech App

- Developed and deployed machine learning-driven predictive analytics and risk-scoring engine for financial decision-making aimed at underserved borrowers.
- Integrated secure payment gateways and interactive financial dashboards, improving user engagement and financial inclusion.

AI Music Generator

- Developed advanced Generative AI models using LSTM, RNN, and MusicLM (Python, TensorFlow) to automatically create genre-specific audio content, showcasing applicability for scalable enterprise solutions in media and advertising.

Tamasha Live (Gaming Platform)

- Converted legacy Java modules into efficient, maintainable Kotlin modules; integrated real-time backend services using AWS.
- Developed and launched popular multiplayer "Ludo" modules, significantly improving user retention and gameplay performance.

EDUCATION

Master of Information Technology - University of New South Wales (UNSW), Sydney, Australia

Feb 2023 – Jan 2025

Bachelor of Technology - University of Petroleum and Energy Studies (UPES), India

May 2015 – Apr 2019

AWARDS & LEADERSHIP

- "Feather on Hat" Award (Multiple) – Nineleaps Technologies.
- Logistics Head, UMS Society – UNSW Sydney: Led 100+ attendee events.
